## I. PENDAHULUAN

HTML (HyperText Markup Language) adalah bahasa markup yang memberi tahu browser web cara menyusun halaman web yang Anda kunjungi. Ini bisa serumit atau sesederhana web menginginkannya. HTML terdiri dari serangkaian elemen, yang Anda gunakan melampirkan, membungkus, atau menandai bagian yang berbeda dari konten untuk membuatnya muncul atau bertindak dalam a tertentu. Tag terlampir dapat membuat konten menjadi hyperlink untuk terhubung kehalaman lain, huruf miring kata-kata, dan sebagainya.

### Struktur Dasar HTML

HTML disusun dari kumpulan elemen yang memiliki tugasnya masing-masing.

Elemen sendiri terdiri dari 2 tag serta konten dari elemen tersebut. Tag yang dimaksud adalah tag pembuka dan tag penutup.

## II. PEMBAHASAN

```

      <p>
        I am a 3rd year computer science student at Pertamina University. Eager
        to learn, explore, and take on challenges in new things. I like to be
        acquainted with new people and work as a team. I ve learned to
        acknowledge both of my capabilities and limitations (self-awareness)
        through the academic and nonacademic activities.
      </p>
